

### To whom it may concern

Consuelo lived with us full time for two weeks to help us take care of our first child. Her services were professional and extremely helpful. Consuelo took wonderful care of our son and of us. She assisted with breastfeeding and pumping, taught us how to bathe our son, how to cut his nails, tried to help us put our son on a schedule, and taught us/ assisted us with all of the baby basics that we would not have known or learned by just reading a book.

Consuelo set up the baby's room (including all of his clothes) and kept the baby's room clean (including the baby's laundry). She offered us tips and advice that we use to date. Consuelo was also invaluable at the baby's bris and taking care of the baby after the bris. Consuelo allowed us to have time needed to sleep, relax and recover from childbirth. She was always helpful when needed but also gave us space so as to allow us time alone with our son.

Not only was Consuelo great with our son, but she was great with assisting in the recovery from childbirth. She definitely made the first two weeks with our son a lot easier. Our son was very happy in Consuelo's care, and so were we. We recommend Consuelo without hesitation.
