

To Whom It May Concern:

We highly recommend Marie Buntin as a baby nurse following 10 nights of her caring for our second son.. We did not have a night nurse for our first child but for the second we decided to get some extra help so we both could get some sleep and peace of mind. Marie came in our first night home from the hospital and was extremely helpful –she is gentle, loving, and non-intrusive. We immediately felt very comfortable with her and we even left the apartment and went to dinner several nights while Marie stayed home with both children.

Since I am breastfeeding, Marie would wake me up to nurse and she would often do one night feeding so I could sleep. It was heaven, and I regret not having baby nurse for my older son! Marie organized the nursery and is very clean, sanitary and professional. She also went beyond her regular duties and did some extra things for us! She was also very attentive and loving toward our 2 ½ year old. She read books to him and helped him better understand what being a big brother is about.

She is a very sweet, thoughtful woman and would be a great asset to any family that hires her. Please call me should you have any questions.
