TO WHOM IT MAY CONCERN

Eveline (Marie) is receiving our highest recommendation following her 10 days of assistance with our newborn. We had just brought our daughter home from the NICU because she arrived one month early, and could not have been comforted more by Marie's attentive, kind care to our five pound daughter. She handled my baby's needs with a gentle touch, knew how to remedy typical preemie matters (e.g. eye discharge, intestinal gas discomfort, retaining body heat, etc.) that we so needed as first-time parents. Marie also kept all items relevant to the baby's care in an orderly fashion. The bottles and breast pump parts were promptly cleaned, sterilized and organized into a cabinet. My need for rest was always met by Marie's initiative to ensure my baby's comfort around the clock.

We were very pleased with her help and welcome her back for future needs. Please do not hesitate to contact me with any questions.
