TO WHOM IT MAY CONCERN:

I would highly recommend Kathleen as a baby nurse. As a first time mother, not only did she teach me invaluable lessons about taking care of a newborn, but she also let me figure out things at my own pace. She was always happy to help out, especially in those long first nights, and did so each time with a smile.

It's clear that she has years of experience, and handles the job with the utmost level of professionalism. I liked her so much, that I extended her time with our family, and we've already spoken about when she can come back to take care of my son in the future. Somehow, in two short weeks, she already felt like part of the family.

Sincerely,

Whitney & Kevin
